Pricing Basis

F	Full Cost Pricing – Refers to the recovery of all direct and indirect costs involved in providing a service
M	Market Pricing – Refers to situations where Council provides services in competition with others in a competitive marketplace (and where Council must comply with National Competition Policy requirements)
P	Partial Cost Pricing – Refers to the situation where less than the full cost of providing a service is recovered. It implies the existence of subsidization from rate revenue or from revenue from other services
R	Regulatory – Refers to the situation where the price or fee for a service is set by legislation and Council cannot charge outside this framework
Z	Zero Cost Pricing – Where no price is charged for the provision of the service

Pricing Principle

A	Broad Community Service – Service provides a broad community benefit and it is impractical to levy a charge
B	Cost Benefit – Service is a minor part of the overall operation of the Council, or the potential for revenue collection is so minor as to be outweighed by the costs of collection
C	Shared Benefit – Benefits from provision of the service accrue to the community as whole as well as individual users
D	Stimulus – A stimulus to the demand for the service is required. In the short term only part of the cost of the service is to be recovered
E	Evasion – Charging prices to recover full cost may result in widespread evasion
F	Equity – The service is targeted to low-income users
G	User Benefit – Service benefits particular users, making a contribution to their individual income, welfare or profits, without any broader benefits to the community.
H	Regulatory – Fee Fixed by Legislation
I	Market – Service provided is in competition with that provided by others and there is pressure to set a price which will attract adequate usage of the service
